HIGH DEMAND TREATMENT

VERSATILE SOLUTION

MULTIPLE APPLICATIONS

EXCELLENT CLIENT RESULTS

# The Pink Solution

The Pink Solution is a Professional Skin Booster Serum, composed of 56 Active Ingredients that helps improve the vitalisation of fibroblast cells, which are the basic structural frameworks of tissues. It is formulated and optimised for the regeneration and repair of damaged and destroyed tissue.

The Pink Solution can be used by both Aesthetic and Medical practitioners as a potent cocktail serum to help revitalise the skin, improve tone and texture, encourage skin regeneration and repair, and enhance the moisture levels. It is a versatile solution with multiple applications to suit your clinics need, with outstanding treatment outcomes and suitable for all skin types.

## Suitable for All Skin Types

The Pink Solution can be applied to all skin types, including skin that is sensitive or dry, or has undergone a dermatological treatment such as laser or peels.

## Safe for Under Eye Application

The Pink Solution can be applied to the under eye area, for dark circle pigmentation. We recommend the 0.5mm depth Turtlepin III Stimulator and to pull the skin down as much as possible to relieve any discomfort.

## Versatile Application

There isn't just one way to apply The Pink Solution. It works harmoniously with other skin procedures, such as Micro-Needling, LED, Galvanic Infusion, and Turtlepin III.

## The Most Unique Potent Cocktail Serum Containing 56 Skin Boosting Actives For Healthy, Glowing Skin!

### Step 1

#### The Pink Solution

56 active ingredients improves the vitalisation of fibroblast cells

### Step 2

#### Turtlepin III

A single-use, multi-needle disposable product delivery system with an Airless Bottle.

### Step 3

#### Natural RX Mask

A Bio-Cellulose mask for the relief of damaged skin following dermatological skin procedures.

### Step 4

NEW

#### Recovery Gel

Revitalise and soothe your skin with our advanced formula

### Step 5

NEW

#### SOS Cover Cre

Soothe and regenerate the skin following dermatological procedures.

## Skin Tone Improvements

- Contains glutathione, which brightens skin and removes free radicals.
- Contains 3 types of enzyme, which contribute to the synthesis of glutathione in skin.
- Contains 10 types of vitamin B complex (vitamin B12), which improves skin metabolism

## Skin Rejuvenation

- Contains growth factors, adenosine A2 receptors, which help quickly recover skin regeneration cycle.
- Contains 6 kinds of peptide (EGF, FGF, IGF, TGF-b, cooper tripeptide), to help vitalise fibroblast cells, which are the basic structural frameworks of tissues.
- Contains neuropeptide complex, which is a growth factor that helps vitalise fibroblast cells and growth of blood vessels, which are essential for wound healing process.

## Skin Moisturisation

- Contains amino acid complex, which increases the content of NMF (natural moisturising factor).
- Contains 1.4 million Dalton of high molecule HA, which can improve skin moisture deficit

## Skin Energy Activation

- Contains vitamin B and amino acid for coenzyme synthesis.
- Contains ubiquinone (coenzyme Q10), which is the connection for the production of ATP

## The Pink Treatment Cycle

### Phase 1: Stimulating 3 Sessions

With an interval of 1 - 2 weeks between treatments.

### Phase 2: Firming 2 Sessions

With an interval of 1 month between treatments

### Phase 3: Maintaining 1 Session

Every 3 to 6 months regularly

## The Pink Hair Treatment

Introducing The Pink Hair Treatment, inspired by the Pink-Aging Treatment. This program prevents and rescues hair loss by activating 56 essential components that rejuvenate fibroblast cells and enhance skin metabolism.

- Patented Pea-peptide Formulation
- Biotin (Vitamin B7)
- 8 Growth Factors
- Coenzyme Q10
- Neuropeptide complex
- Amino acids Complex
- Panthenol (Vitamin B5)

### Normalises scalp condition

With anti-inflammatory and antimicrobial ingredients, Pink Hair moisturizes the scalp, providing a basic environment for cell proliferation

### Improves hair thickness

With promotion of keratin protein and collagen synthesis, Pink Hair stimulates hair growth and strengthens it

### Normalises hair growth cycle

Consistent use of Pink Hair helps increase hair density and accelerate scalp regeneration cycle

### Strengthens roots

Pink Hair strengthens the roots of hair while increasing the density of scalp

**Ready! Shoot! Grow!**
